

Obere Gerald Jackson

Highly motivated and dedicated, I am a tech enthusiast with a strong passion for all things related to technology and software development. My primary goal is to contribute my technical expertise to a professional setting that values excellence and innovation in computing. I am eager to work on projects that allow me to employ my problem-solving skills and creativity to deliver exceptional products and services tailored to meet client specifications. As I pursue opportunities as a Junior Developer, I am excited to embrace challenging roles that will leverage my skills and experience to develop cutting-edge solutions and make a positive impact in the industry.

PERSONAL PROFILE

- Attentive and accurate in following instructions
- Organized, capable of planning and strategizing work, and adept at prioritizing tasks
- Adaptable and resilient, able to work long hours with minimal supervision
- Collaborative with a growth mindset and a keen problem-solving ability
- Honest, self-motivated, and disciplined team player with a positive attitude and high integrity
- Excellent communicator with fluent English skills
- Eager and quick learner, thriving in dynamic and challenging environments with strong sense of motivation.

QUALIFICATION AND OTHER APPRENTICESHIP SKILLS

- Experienced developing cutting-edge frontend web based applications using ReactJS, HTML5, CSS3, Bootstrap and JavaScript.
- Experienced developing backend applications using Ruby, Active-record Sinatra and Ruby on Rails
- Building scalable APIs with ruby on rails.
- Experienced using version control tools such as Git, Github, Gitlab
- Experienced optimizing code conforming best code practices
- Experienced working with agile methodologies of project management such as Jira, kanban and scrum

PROJECTS

Portfolio — <https://portfolio-iamkibeh.vercel.app/>

My portfolio Website was built using Vuejs and Tailwinds css

Comments—<https://interactive-comments-a6k7.onrender.com>

In collaboration with a talented friend, Muchiri Andrew (<https://github.com/MuchiriAndrew>), we successfully completed the comment project, contributing to the backend development using Ruby on Rails and PostgreSQL while Muchiri handled the frontend with Vue.js. This experience enhanced my collaboration, Git, and GitHub skills, and provided practical knowledge in web application deployment on Render. I am proud of our efforts and excited to apply these learnings in future projects as a developer.
